Summary

Software engineer with 5+ years of full-stack experience designing and deploying production systems across Java, Spring Boot, React, and AWS. Strong collaborator who has served as Scrum Master, mentored peers, and maintained high code quality through automated testing and CI/CD. Driven by challenging problems, good engineering, and teams that take pride in what they build.

Education

Bachelor of Science, Computer Science

May 2020

Rutgers University • New Brunswick, NJ • GPA: 3.51

Technical Skills

- **Languages** – Java • JavaScript • Typescript • Python
- **Frameworks & Libraries** – Spring Boot • ReactJS • NodeJS • MaterialUI
- **Testing** – Jest • React Testing Library • WebDriver • JUnit
- **Cloud & Infrastructure** – AWS • ECS • CloudFormation • SQS • Docker
- **CI/CD** – Jenkins • Git • Bitbucket • Github • Railway
- **Databases** – PostgreSQL • MySQL • MongoDB
- **Monitoring** – New Relic • PagerDuty • Sumologic
- **Developer Tools** – LaunchDarkly • Postman • VS Code • IntelliJ • Eclipse
- **AI** – Github Copilot • ChatGPT/Claude • Claude Code • Cursor

Experience

ICIMS • Holmdel, NJ

Software Engineer

October 2022 – December 2025

- Architected and documented a scalable database schema and RESTful API contract for a new Java microservice, enabling seamless adoption by multiple internal services
- Served as Scrum Master, facilitating all Scrum ceremonies to improve sprint planning, cross-team communication, and delivery predictability
- Mentored an associate-level engineer through onboarding and ongoing skill development, accelerating ramp-up and improving code quality
- Designed and implemented a feature-flag versioning process, identifying and removing 66% + outdated variations to reduce configuration sprawl and improve cross-team clarity
- Built and integrated automated WebDriver tests for critical user workflows within the CI/CD pipeline, catching regressions before production
- Executed comprehensive test coverage across unit, integration, accessibility, and performance testing to ensure reliable, user-friendly releases
- Led and evaluated technical interviews for software engineering interns, contributing to hiring decisions and team growth

Associate Software Engineer

April 2021 – October 2022

- Led ReactJS knowledge sharing sessions for a team of 3 engineers, improving proficiency and reducing the frequency of React-related blockers during sprints

- Collaborated with the cloud hosting team to execute a production database migration off a shared cluster, minimizing downtime and preventing data loss
- Developed and executed automated unit, integration, accessibility, and performance tests to enforce release quality standards
- Stepped into the Scrum Master role for the first time, facilitating ceremonies and developing team coordination skills

Life Skills Software, Inc • Red Bank, NJ

Full Stack Developer

May 2020 – June 2021

- Designed and implemented a classroom management system providing administrators with full visibility into classroom activity using React, Node.js, and MongoDB
- Rebuilt and modernized multiple UI scenes from the ground up using Material UI to improve consistency and maintainability
- Increased code coverage by 10% using Jest while actively practicing Test Driven Development
- Enhanced user experience by designing and implementing an interactive onboarding tutorial for first-time users
- Enabled a direct-to-consumer platform migration by implementing generated access codes for secure user registration
